

March 2007

Use the power of Kinetic to travel the world with the Arctura G.M.T.

For 2007, the Arctura collection is strengthened by the addition of a new caliber which offers G.M.T. convenience on top of SEIKO's ultimately user-friendly Kinetic technology.

Since 1997, Arctura has been the signature design for SEIKO's Kinetic technology and it now boasts 10 years of success as one of SEIKO's most appreciated and iconic Elite Collections. Arctura stands for strong, solid build quality and aerodynamic design inspired by the arc of nature; in rainbows or in the curvature of the earth, the arc is central to nature's plan and Arctura draws its strength from the eternal beauty of this shape.

Arctura Kinetic G.M.T. is the perfect travellers' watch.
Ultimate precision, ultimate convenience & an ultimately streamlined design.
SUN 003 , SUN 001

The marriage of Kinetic with a G.M.T. function makes this the perfect travellers' watch. The hour hand can be set without disturbing the accuracy of SEIKO's unique Kinetic movement and as Kinetic requires no battery change, this streamlined and refined new timepiece offers the international traveller a unique combination of elegance, powerful design and 'set & forget' convenience.

Kinetic G.M.T. joins 4 other Kinetic calibers in the Arctura range which now comprises no less than 14 models.

Kinetic G.M.T., Caliber 5M65

Hour, minute and second hands with calendar

G.M.T. hand

Hour hand can be adjusted independently from the other hands in one hour units
